15. Event Session Time Conflict

Identify overlapping sessions within the same event (i.e., session start and end times that conflict).

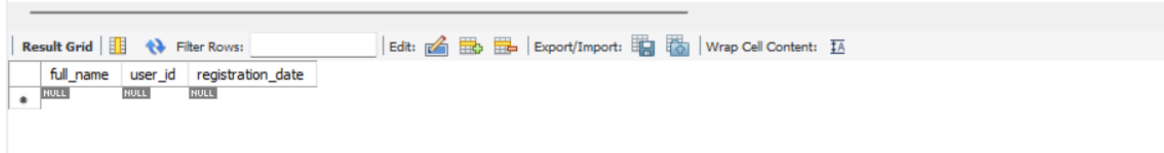

```
202 -- Q15
203 • select s1.event_id , s1.title as session_1, s2.title as session_2, s1.start_time as s1_st , s1.end_time as s1_et, s2.start_time as s2_st, s2.e
204 from Sessions s1
205 join Sessions s2 on s1.event_id = s2.event_id and s1.event_id < s2.event_id
206 where s1.start_time < s2.end_time and s1.end_time > s2.start_time;
```

16. Unregistered Active Users

Find users who created an account in the last 30 days but haven't registered for any events.

```
207
208 -- Q16
209 • select full_name,user_id,registration_date
210 from Users u
211 where registration_date >= curdate() -interval 30 day and user_id not in (select user_id from Registrations);
```

17. Multi-Session Speakers

Identify speakers who are handling more than one session across all events.

```

213 -- Q17
214 • select speaker_name, count(*) as session_count
215 from Sessions
216 group by speaker_name
217 having count(*) >1;
